## **LETTER OF INTENT**

This letter serves to inform the public about the intentions set forward by the newly formed Tiny Home Alliance of Canada (THAC). From this day forward we have committed to the following mandate:

1. We will act on behalf of Canadians at the federal, provincial and municipal levels to update building codes so that tiny homes are deemed legal to live in.
2. As a collective, we are using our combined skillset, expertise and professional knowledge to -----
  - a. Educate the public.
  - b. Advocate on behalf of the tiny home industry and the people who live in the homes.
3. We will work with the public, industry leaders and the government regarding our mandate.
4. We will work with federal, provincial and municipal governments to create solutions that are fair for all taxpayers, including Canadians who are in need of alternative and affordable housing.
5. We will be in contact with the media regarding our intentions, and are open to questions and interviews.
6. We have endorsed the policies set forward by GenSqueeze and will be working closely with their organizers to bring further attention to the growing housing crisis in Canada.
7. We look forward to working with all interested parties.

**Thank You,**

The Tiny Home Alliance of Canada
